

Bootstrap

Let's do a quick review

- HTML5
- CSS3
- Google Developer Tools
- canluse
- Emmet
- Google Fonts
- Google Responsive Test
- Normalize
- Responsive Design Patterns
- Frameworks

HTML5

Class and ID selector

HTML

```
<!-- WILL match -->  
<div class="module"></div>
```

CSS

```
.module {  
  
}
```

HTML

```
<!-- WILL match -->  
<div id="happy-cake"></div>
```

CSS

```
#happy-cake {  
  
}
```

Tag selector

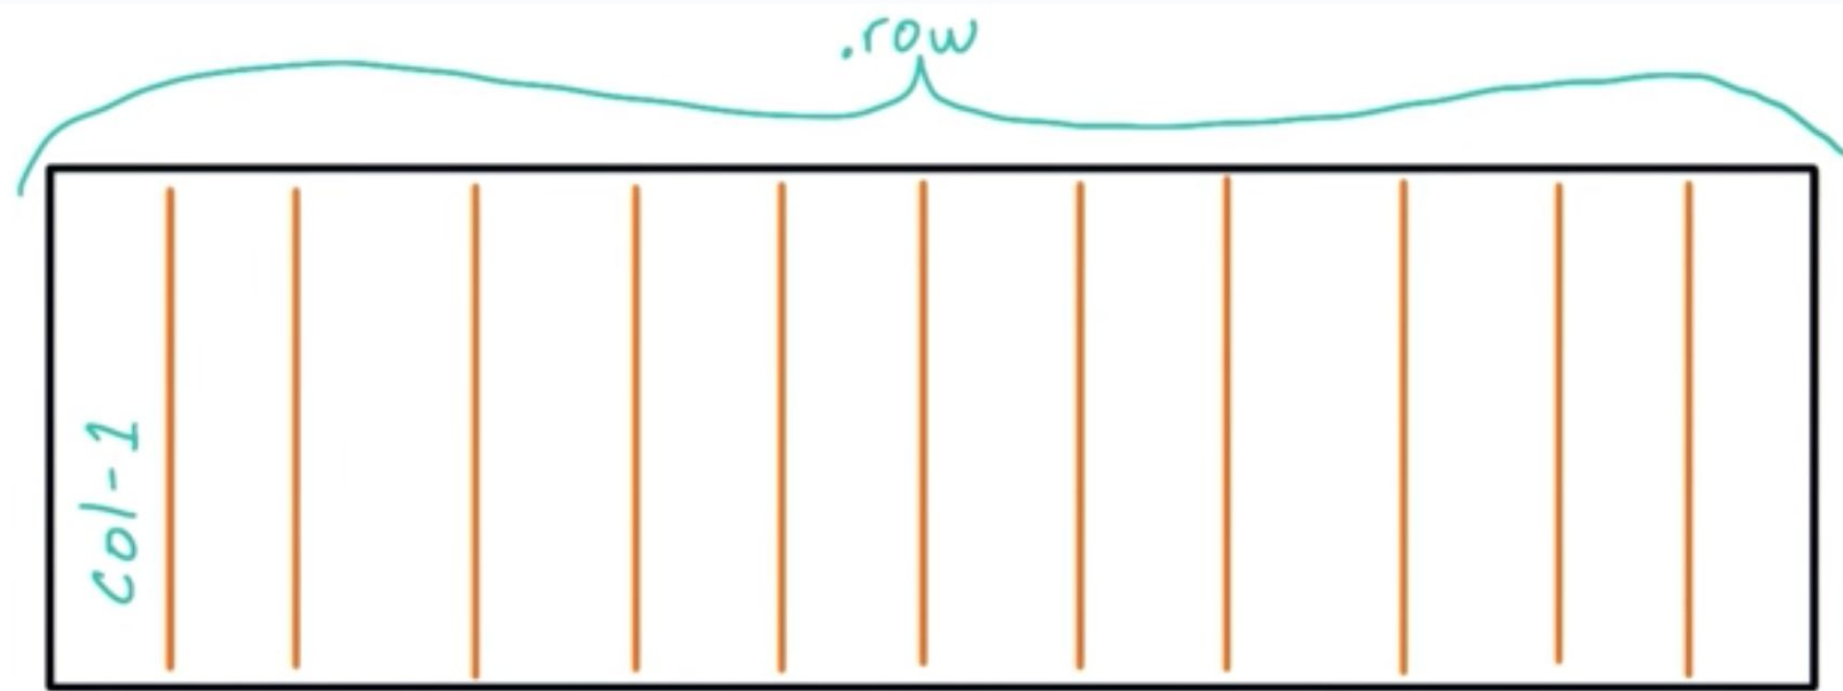

CSS

```
h2 {
```

```
}
```

Mobile First

- Content: Select the most important content.
- Layout:
 - Design for small widths first.
 - Base CSS is for mobile. Media queries for bigger elements.
- Progressive enhancement

└ col-2 ─┘

└ col-3 ─┘

└ col-12 ─┘

Bootstrap

- Mobile First
- Cross-Browser Compatible
- Fully responsive

What is included?

- Cool Grid System
- Predefined styles.
- Components

Challenges time!
